Legend for Geotechnical Data

Grain Size Scale for Sediments

Unified Soil Classification		APTIM Standard Sieve Stack					
	(USCS) 2487/2488)	Sieve Number	Size (phi)	Size (mm)			
	Coarse Gravel	3/4	-4.25	19.03			
	Fine Gravel	5/8	-4.00	16.00			
Gravel		7/16	-3.50	11.20			
		5/16	-3.00	8.00			
		3 ½	-2.50	5.60			
		4	-2.25	4.75			
	Coarse Sand	5	-2.00	4.00			
		7	-1.50	2.80			
		10	-1.00	16.00 11.20 8.00 5.60 4.75 4.00 2.80 2.00 1.40 1.00 0.71 0.50 0.36 0.25 0.18			
		14	-0.50	1.40			
Sand	Medium Sand	18	0.00	1.00			
	Wediam Sand	25	0.50	4.75 4.00 2.80 2.00 1.40 1.00 0.71 0.50 0.36 0.25 0.18 0.13			
		35	1.00	0.50			
		45	1.50	0.36			
		60	2.00	0.25			
	Fine Sand	80	2.50	0.18			
	1 me Sand	120	3.00	0.13			
		170	3.50	0.09			
		200	3.75	0.08			
Fines	Silt/Clay	230	4.00	0.06			

Proportional Definition of Descriptive Terms

<u>Descriptive Term</u>	Range of Proportions
Sandy, gravelly, etc.	35 % to 50 %
Some	20 % to 35 %
Little	10 % to 20 %
Trace	1 % to 10 %

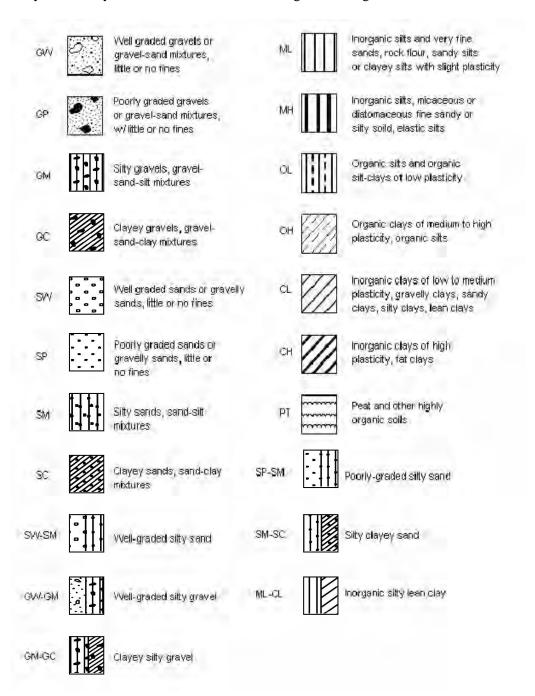

Consistency of Cohesive Soils

Description	Consistency Index	Approximate Undrained Shear Strength (kPa)	Field Identification	
Hard		Over 300	Indented with difficulty by thumbnail, brittle.	
Very Stiff	>1	150-300	Readily indented by thumbnail, still very tough.	
Stiff	0.75-1	75-150	Readily indented by thumb but penetrated only with difficulty. Cannot be moulded in the fingers.	
Firm	0.5-0.75	40-75	Can be penetrated several centimeters by thumb with moderate effort and moulded in fingers by strong pressure.	
Soft	< 0.5	20-40	Easily penetrated several centimeters by thumb, easily moulded.	
Very Soft		Less than 20	Easily penetrated several centimeters by fist, exudes between fingers when squeezed in fist.

USCS Classifications

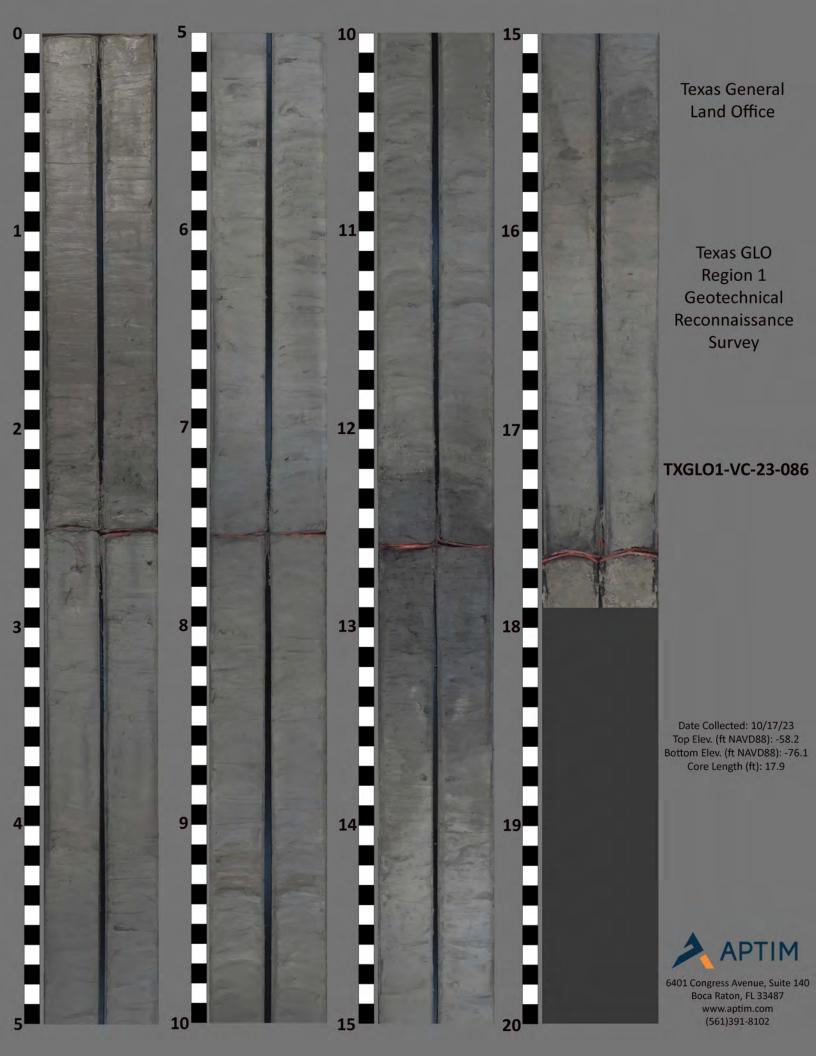

Refers to the Army Corps of Engineers Unified Soils Classification System. Class types are defined primarily by grain size, sorting and percent of material passing the #200 sieve. Classification of materials on the core logs based on visual field examinations are identified on the core logs under the Classification of Materials Description. Classifications based on laboratory sieve analyses are identified on the core logs in the Legend and under Remarks.

Note: Information is after ACOE Atlantic Division Manual # 1110-1-1 titled Engineering and Design Geotechnical Manual for Surface and Subsurface Investigations
